# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference 51116	FOR FURTHER ACTION	See item 4 below	
International application No. PCT/IL2004/000466	International filing date (day/month/year) 01 June 2004 (01.06.2004)	Priority date (day/month/year) 05 June 2003 (05.06.2003) ]	
International Patent Classification (IP 7 H04N 7/16	C) or national classification and IPC		
Applicant NDS LIMITED			

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).	
2.	This REPORT consists of a total of	of 4 sheets, including this cover sheet.
		ce to the written opinion of the International Searching Authority should be read as a reference port on patentability (Chapter I) instead.
3.	This report contains indications re	elating to the following items:
	Box No. I	Basis of the report
	Вох №. П	Priority
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
	Box No. IV	Lack of unity of invention
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	Box No. VI	Certain documents cited
	Box No. VII	Certain defects in the international application
	Box No. VIII	Certain observations on the international application
4.		nmunicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but akes an express request under Article 23(2), before the expiration of 30 months from the priority

	Date of issuance of this report 08 December 2005 (08.12.2005)
The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland	Authorized officer Simin Baharlou

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/IL04/00466

	INTERNATIONAL DELICATION AND ADMINISTRATION AND ADM
Box No	a. I Basis of this opinion
. With r	regard to the language, this opinion has been established on the basis of the international application in the language in which it led, unless otherwise indicated under this item.
	This opinion has been established on the basis of a translation from the original language into the following language which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With i	regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed tion, this opinion has been established on the basis of:
a.	type of material
	a sequence listing
	table(s) related to the sequence listing
b.	format of material
	in written format
	in computer readable form
c.	time of filing/furnishing
	contained in international application as filed.
	filed together with the international application in computer readable form.
	fumished subsequently to this Authority for the purposes of search.
3. 🗌	In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/IL04/00466

applicability; citations and ex	tle 43 <i>bis</i> .1(a)(i) with regard to novelty, inventive step planations supporting such statement	
Novelty (N)	Claims <u>43</u> Claims <u>1-42 AND 44-74</u>	YES
Inventive step (IS)	Claims NONE Claims 1-74	NO
Industrial applicability (IA)	Claims 1-74 Claims NONE	YE

Claims 1-42 and 44-74 lack novelty under PCT Article 33(2) as being anticipated by Rajamaki et al. (US 20030038893 A1). With respect to claims 1-42 and 44-74, Rajamaki teaches a method and system including a broadcast receiver, i.e., set top box or mobile terminal coupled to a television or a telephone. The method and system are provided for generating a background image for television, computer monitor or other device. Particularly, while viewing a television program received from a cable television provider, satellite television provider or other source, the user may see a picture that the user would like to store as a background screen for television or television provider or other source, the user may make a selection with remote control to select the picture. After receiving a capture command, the video stream is monitored and the next picture frame that has complete picture information is identified. The capture command may come form a mobile phone terminal, computer terminal, remote control or other device. After a proper picture frame is identified, the picture frame is stored in a memory. The picture frame may be retrieved from memory and transmitted to display buffer or video encoder to be displayed on television or other external device monitor. Rajamaki also teaches that the user may view prompts or video encoder to be displayed on television or other external device monitor. Rajamaki further discloses that computer on the television screen instructing the user to enter information to make the association. Rajamaki further discloses that computer on the television screen instructing the user to enter information to make the association. Rajamaki further discloses that computer on the television screen instructing the user to enter information to make the association. Rajamaki further discloses that computer on the television screen instructing the user to enter information to make the association. Rajamaki further discloses that computer on the television of the formats and transmit data to other en

Claim 43 lacks an inventive step under PCT Article 33(3) as being obvious over Rajamaki et al. (US 20030038893 A1).

With respect to claim 43, Rajamaki does not teach producing an indication of agreement by a user to pay for the transmitting. It is noted that providing information of agreement by a user to pay for a service is well known in the art. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Rajamaki by providing information of agreement by a user to pay for a service for security purposes.

Claims 1-74 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
